

Secure critical data and keep it safe

iomega® NAS servers are secure, affordable and keep your network running at top performance

IT budgets are shrinking, your storage needs are growing, but the need for data security is higher than ever. You need to make sure that there are checks and balances in place to secure your data from theft, natural disaster and/or computer system failure.

Viruses and data attacks to the network are increasing daily. Your users connect outside the company every day and your challenge is to keep your company's digital assets safe and secure without prohibiting access to needed information. There is an affordable and simplified solution—critical data security with an iomega NAS server.

Reliable backup solution for critical data security

iomega NAS servers deliver secure, centralized data storage and multi-platform data consolidation. Access controls can determine who saves what and where. The server(s) can be housed in a secure location but even with physical access there are no CD-RW devices or other removable media to worry about. Administrative access requires authentication (ADS, NIS, NDS (bindery emulation), or NT Domain).

With iomega NAS servers you can secure and backup the data that is on users' desktops, and enforce a virus check on all new files before they get saved on the network. Installation is quick and easy and best of all iomega NAS servers are affordable (less than \$.02 per megabyte)!

iomega NAS file servers secure critical data and keep it safe with:

- ▶ RAID 5 + hot spare data protection
- ▶ Disaster Recovery
- ▶ Fault-tolerant features
- ▶ Fail-over protection

iomega NAS servers maximize data accessibility by consolidating multiple formats and data types on a server appliance designed solely to store, serve and protect critical information. With plug-and-play connectivity, you can deploy your iomega NAS server in less than 15 minutes. And if you need more capacity, just add another iomega NAS—for a truly scalable storage solution.

Storage relief for your network.

iomega NAS.

Additional Solutions Guides:

- ▶ Backup intermediary
- ▶ Branch/remote office storage and collaboration
- ▶ CAD/CAM, creative imaging and graphics
- ▶ Email storage
- ▶ Engineering firms
- ▶ Financial/accounting firms
- ▶ Law firms
- ▶ Medical institutions, hospitals, doctor clinics
- ▶ Online data warehousing
- ▶ Schools and universities
- ▶ Service providers
- ▶ Software distribution
- ▶ Storage consolidation
- ▶ Student computer labs
- ▶ Workgroup file sharing/backup and recovery

Critical Data Security

iomega® NAS server advantages vs. a general-purpose server

- ▶ Up to a 50% lower purchase cost
- ▶ Significantly lower total cost of ownership
- ▶ Easy installation with no network downtime
- ▶ Deployment in under 15 minutes
- ▶ Automatic data consolidation and file sharing among all Windows®, Macintosh®, NetWare®, UNIX and Linux clients
- ▶ As little as four hours per year in ongoing maintenance
- ▶ Remote management flexibility and convenience

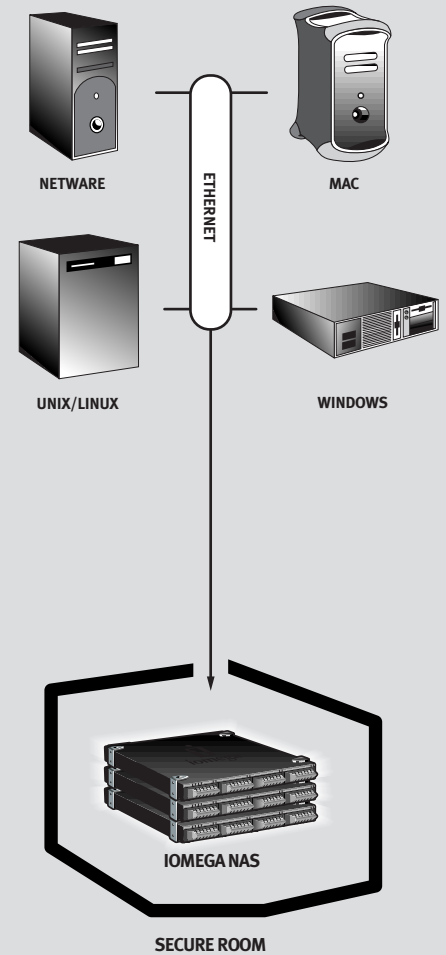

iomega® QuikSync™ 3 Software

Protecting critical client data is hassle free with iomega QuikSync software. Copies of designated files are automatically saved and maintained on your iomega NAS server based on preferences set by your NAS administrator.
