

## Take control of growing data with cost-effective digital archiving

*iomega® NAS servers are the affordable, simplified solution for data consolidation, storage and accessibility*

Rapid growth in the creation, exchange and dissemination of data by businesses, hospitals, government agencies, schools and universities, publishers and cultural institutions has made efficient data storage and management a critical challenge.

Graphics, records, video and scanned document files can quickly push your existing storage capacity to the limit – and yet, reliable, easy access to this information remains critical. While data storage and availability requirements are growing exponentially, IT budgets and resources are shrinking. There is an affordable and simplified solution – digital archiving with an iomega NAS server.

### *The optimal digital archiving storage solution*

iomega NAS servers provide a fast, simple and cost-effective way to digitally archive enormous amounts of data, including:

- ▶ Large digital multimedia files such as video, audio, photographic images, Webinars and graphics.
- ▶ Information sources such as periodicals, newspapers, research and reports that grow on a daily basis.
- ▶ Digitized medical records, business or legal contracts and correspondence.

iomega NAS servers maximize accessibility to these files by consolidating multiple formats and data types on a server appliance designed solely to store, serve and protect critical information. With plug-and-play connectivity, you can deploy your iomega NAS server in under 15 minutes, and the streamlined design requires as little as four hours of maintenance per year. And if you need more capacity, just add another iomega NAS – for a truly scalable storage solution.

**Storage relief for your network.**

**iomega NAS.**

### **Additional Solutions Guides:**

- ▶ Backup intermediary
- ▶ Branch/remote office storage and collaboration
- ▶ CAD/CAM, creative imaging and graphics
- ▶ Critical data security
- ▶ Email storage
- ▶ Engineering firms
- ▶ Financial/accounting firms
- ▶ Law firms
- ▶ Medical institutions, hospitals, doctor clinics
- ▶ Online data warehousing
- ▶ Schools and universities
- ▶ Service providers
- ▶ Software distribution
- ▶ Storage consolidation
- ▶ Student computer labs
- ▶ Workgroup file sharing/backup and recovery

**Iomega® NAS server advantages vs. a general-purpose server**

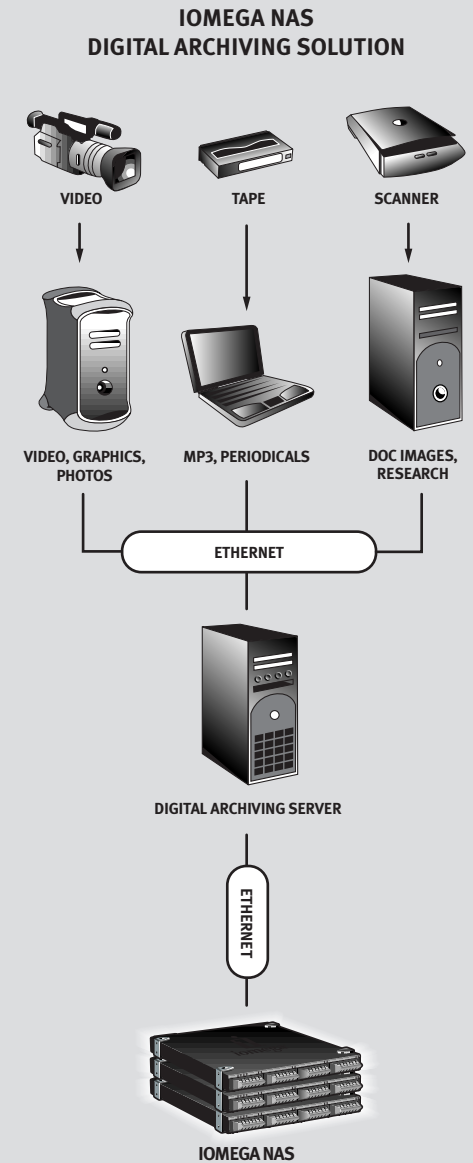

- ▶ Up to a 50% lower purchase cost
- ▶ Significantly lower total cost of ownership
- ▶ Easy installation with no network downtime
- ▶ Deployment in under 15 minutes
- ▶ Automatic data consolidation and file sharing among all Windows®, Macintosh®, NetWare®, UNIX and Linux clients
- ▶ As little as four hours per year in ongoing maintenance
- ▶ Remote management flexibility and convenience

**Iomega® QuikSync™ 3 Software**

Protecting critical client data is hassle free with Iomega QuikSync software. Copies of designated files are automatically saved and maintained on your Iomega NAS server based on preferences set by your NAS administrator.
