

Consolidate, backup, and restore large volumes of e-mail

Add e-mail storage to your network—affordably and quickly

While IT budgets and staff sizes are shrinking, e-mail archiving and storage needs are growing. More than ever, users choose e-mail to send and receive their important data. Often times, this e-mail includes large file attachments. Because of this, network congestion is increasing and users don't have a reliable e-mail management tool to clean up, delete or archive their e-mail.

Attached files with large graphic documents will quickly consume your existing storage capacity. Reliable and easy access to this information remains critical. The interoperability of a general-purpose server at the cost of a tape-based backup solution is what you need. Iomega NAS file servers are your scalable and cost-effective solution that provides comprehensive connectivity and simple cross-platform support.

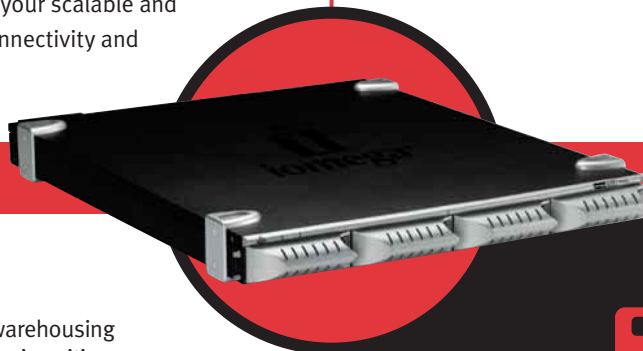

The efficient e-mail management and storage solution

Iomega NAS file servers provide a fast, simple, and cost-effective way to manage, archive and consolidate multi-platform e-mail data.

- ▶ Messages and attachments are stored centrally
- ▶ High-speed server performance at a price comparable to tape
- ▶ Off-load network traffic and relieve congestion
- ▶ Fast, easy-to-use and multi-platform
- ▶ Installation is as easy as plug-and-play
- ▶ Maximize uptime

Iomega NAS servers maximize accessibility to e-mail files by consolidating multiple formats and data types on a server appliance designed solely to store, serve and protect critical information. With plug-and-play connectivity, you can deploy your Iomega NAS server in less than 15 minutes, and the streamlined design requires as little as four hours of maintenance per year. And if you need more capacity, just add another Iomega NAS—for a truly scalable storage solution.

Storage relief for your network.

Iomega NAS.

Additional Solutions Guides:

- ▶ Backup intermediary
- ▶ Branch/remote office storage and collaboration
- ▶ CAD/CAM, creative imaging and graphics
- ▶ Critical data security
- ▶ Engineering firms
- ▶ Financial/accounting firms
- ▶ Law firms
- ▶ Medical institutions, hospitals, doctor clinics
- ▶ Online data warehousing
- ▶ Schools and universities
- ▶ Service providers
- ▶ Software distribution
- ▶ Storage consolidation
- ▶ Student computer labs
- ▶ Workgroup file sharing/backup and recovery

Iomega® NAS server advantages vs. a general-purpose server

- ▶ Up to a 50% lower purchase cost
- ▶ Significantly lower total cost of ownership
- ▶ Easy installation with no network downtime
- ▶ Deployment in under 15 minutes
- ▶ Automatic data consolidation and file sharing among all Windows®, Macintosh®, NetWare®, UNIX and Linux clients
- ▶ As little as four hours per year in ongoing maintenance
- ▶ Remote management flexibility and convenience

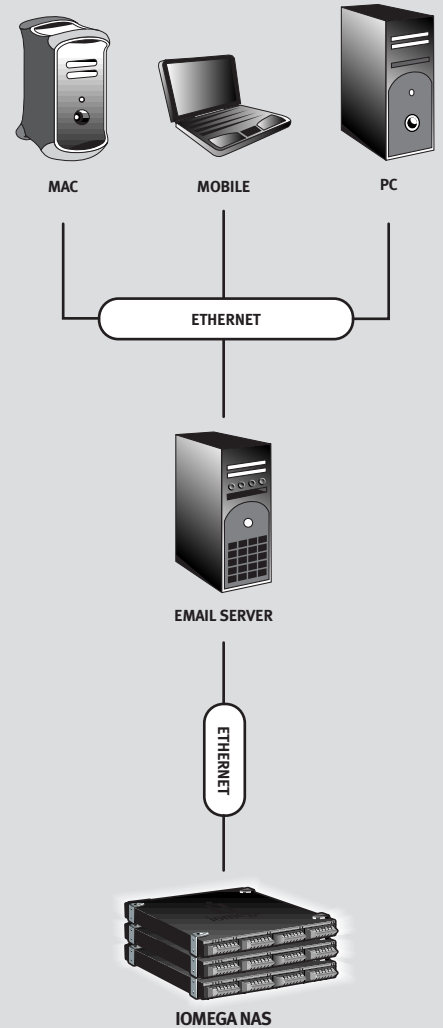

Iomega® QuikSync™ 3 Software

Protecting critical client data is hassle free with Iomega QuikSync software. Copies of designated files are automatically saved and maintained on your Iomega NAS server based on preferences set by your NAS administrator.
