

HOW TO: GAMING CONSOLE

PLAY ALL YOUR MEDIA THROUGH YOUR GAME CONSOLE
USING AN IOMEGA® NAS DEVICE

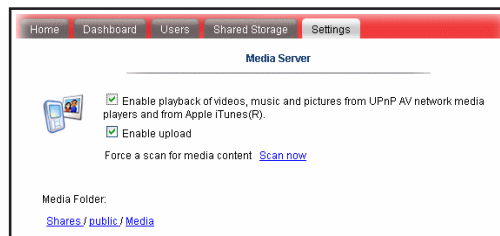

SITUATION: I have lots of photos, movies and songs stored on my Iomega StorCenter™ NAS device. My game console is my playback source in my entertainment center, and I want to play all my media on the Iomega NAS device through my game console.

PLAY MEDIA STORED ON YOUR IOMEGA NAS DEVICE

The embedded media server in Iomega StorCenter NAS devices allows you to stream music, photos and movies to your game console, either Playstation® 3 (PS3) or Xbox 360™. This means you can use your game console as your primary entertainment center, while securely storing all your media content on your Iomega NAS device. Since the Iomega NAS device is a DLNA media server, it supports most media formats supported by your game console.

ENABLE PLAYBACK OF MEDIA CONTENT

To enable playback of media content on your game console, access the Media Server page of the EMC® LifeLine™ Manager by navigating to the **Settings** tab and clicking **Media Services > Media Server**. Check the **Enable playback of videos** checkbox.

SET UP YOUR NAS DEVICE MEDIA FOLDER

Move all your media content in the Media Folder specified on the Media Server page and/or any Public Media folder created directly below any user's folder, such as the **Samuel/Public Media** folder. Any media content contained in these specific folders will be scanned and made accessible to the game console.

You can change the media folder from the default setting (Shares/public/Media) to any folder you want. After you have changed your media folder, be sure the newly selected folder is connected to your computer by accessing the **Shared Storage** tab. You will know it's connected when the pushpin next to the folder is pointed in. That's it! The folder is ready for content.

PLAYING CONTENT THROUGH YOUR GAME CONSOLE

Playing content through your game console is a snap and doesn't require any special setup.

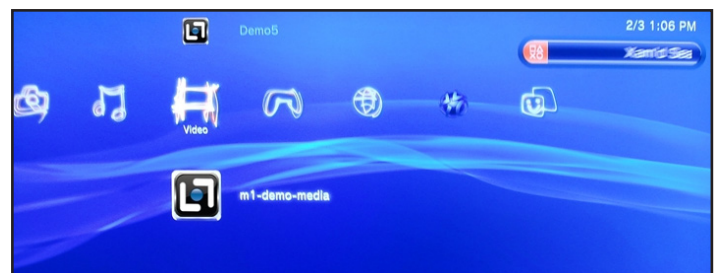

XBOX 360

Using Xbox 360's latest dashboard (version 2.0.7357.0), you can view Xbox 360-supported media stored on your Iomega NAS device. Simply access the video, music or picture libraries under the My Xbox menu of your Xbox 360, and your Iomega NAS device content will automatically display. No setup is required.

PLAYSTATION 3

You can view PS3-supported media stored on your Iomega NAS device through the PS3 Cross Bar menu. Simply access the Video, Music or Pictures submenus, and your Iomega NAS device content will automatically display. No setup is required.
