

Iomega® StorCenter™ Pro NAS Solutions

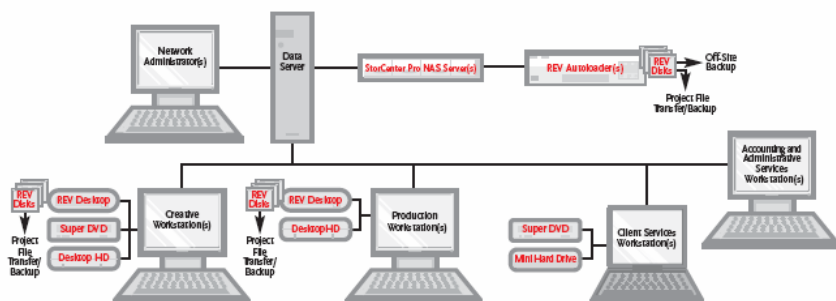

WHY NETWORK ATTACHED STORAGE (NAS)?

Organizations of all sizes are looking for innovative and cost effective ways to manage exponential data proliferation and increased protection. A network attached storage (NAS) device is a flexible and effective way to address these issues, because it offers:

- More storage capacity to existing networks, without shutting down other servers for storage upgrades
- Existence anywhere within a LAN/WAN with the ability to add multiple networked NAS servers
- Separate storage from an application server, which still handles the data processing, while the NAS servers deliver data to the user
- A dedicated server for file sharing and data storage

NAS servers allow expansion of storage capacity for both server and clients

Typical deployment for a small or medium-sized company

StorCenter™ Pro

WHY IOMEGA STORCENTER PRO NAS SERVERS?

Iomega StorCenter Pro NAS servers provide a simple solution to protect, manage and share your critical information. They are designed specifically for small offices/remote offices, small or medium businesses and workgroup environments.

Versatile Interoperable storage solutions – share across all Microsoft Windows, Macintosh, NetWare, UNIX and Linux platforms

High-Capacity, Performance Add capacity and performance to existing networks without shutting down other servers for storage upgrades - up to 1.6TB

Fast Deployment in under 15 minutes with an intuitive web-based interface

Trouble-Free Dedicated server for file sharing – hot-swappable drives available with RAID 0, 1 and 5 file protection

Secure Client backup and virus protection

Value-Added Optional features include wireless connectivity, print server and REV™ drive built-in*

Cost-Effective Lower total cost of ownership (TCO) relative to direct attached storage

STORCENTER PRO NAS SERVERS

- Workstation Backup and Restore
- Near-line Storage Consolidation
- File Sharing & Email Storage
- Disaster Recovery
- Print Serving
- Data Replication

SMALL OFFICE, HOME OFFICE DESKTOP SOLUTIONS

iomega® StorCenter™ Pro NAS servers solve a number of problems faced by small business owners today such as providing a variety of file and data management capabilities to address growing storage requirements, protecting business critical information in an easily accessible repository and improving productivity among users by maintaining network server performance.

StorCenter Pro NAS 100d Servers

- Ergonomic desktop form factor and extremely quiet operation fits easily on any desktop or in a closet
- Improves existing server and network performance – deployed in minutes almost anywhere
- Flexible storage integrates seamlessly into a wireless network with built-in access point
- Supports up to 25 clients for simultaneous multi-share access and read & write capability

StorCenter Pro NAS 200d Servers

- Easily accessible and antivirus-hardened storage vault with RAID 0,1 and 5
- Recovers data from accidents, operator errors or viral attacks
- Improves office productivity with faster and more efficient information and file sharing
- Installs in just 15 minutes with plug-and-play network connectivity and intuitive installation tools

SMALL OR MEDIUM-SIZED BUSINESS RACKMOUNT SOLUTIONS

Small and medium-sized businesses today require maximum uptime and long term data access. iomega StorCenter Pro NAS server and autoloader solutions address these needs with enterprise quality data protection and disaster recovery – at an affordable price. The solutions are easy to install with plug-n-play integration into existing networks and expand the storage capacity for existing networks – all without business interruptions.

StorCenter Pro NAS 300r Servers

- Affordable enterprise quality backup and archiving solution with hardware RAID 0,1
- Installs in just 15 minutes with plug-and-play network connectivity and intuitive installation tools
- A true hot swap Serial-ATA hard drive that protects against data loss and system downtime
- Secure and protect your business information in an easily accessible antivirus hardened storage vault

StorCenter Pro NAS 400r Servers

- Protects your business information in an easily accessible and antivirus hardened storage vault
- Recovers data from accidents, operator errors or viral attacks
- Expands storage capacity on your existing network without business interruptions
- Improves business productivity with faster and more efficient information and file sharing
- A robust solution that provides up to 1.6TB of high performance RAID 0,1 and 5 protected storage

iomega® REV™ Autoloader 1000

- A complete backup solution with enterprise-level backup and disaster recovery. Its revolutionary removable hard disk-based technology provides unprecedented price and performance advantages over traditional tape solutions
- High-capacity device with up to 350GB native capacity or 700GB with 2:1 compression to store and share large files, or back up an entire system
- No additional maintenance for tape cleaning, re-tensioning or media replacement
